Gothenburg, Sweden

PROFILE

Software developer who builds with LLMs and AI agents. At Volvo Technology I wrote an agent that answered engineers' questions about truck test data and took it from a thesis prototype to a Kubernetes deployment. Since then I've shipped open-source developer tools on npm, VS Code and Chrome. What I'm best at is getting AI coding agents to do reliable work on a real codebase. MSc in Engineering Physics from Chalmers.

PROFESSIONAL EXPERIENCE

Associate Data Scientist
Nov 2024 – Jun 2025

Volvo Technology, Gothenburg

- Connected the thesis agent to the single cylinder team's test database and deployed it for their engineers.
- Presented the tool to teams and department meetings, and helped engineers get started with it.

Technologies: Python, LangChain, OpenAI, PostgreSQL, Trino, S3, Streamlit, Kubernetes, Langfuse

Applied AI Intern
Jun – Sep 2024

Volvo Technology, Gothenburg

- Deployed the thesis prototype on Volvo's internal Kubernetes cluster for the fuel cell team.
- Presented it remotely at Generative AI for Automotive USA 2024, an industry conference.

Technologies: Python, lagent, Mixtral-8×7B, CodeLlama-34B, Llama 3.1 70B, Streamlit, Kubernetes

Master's Thesis
Jan – Jun 2024

Volvo Technology, Gothenburg

- Prototyped an agent that turned plain-English questions about test data into plots and calculations.
- Scored 94% on computation requests and 90% on plots, rated by four evaluators against known answers.

Technologies: Python, lagent, Mixtral-8×7B, CodeLlama-34B, Streamlit

AI Intern
Jun – Aug 2023

Bac Ha Software, Hanoi

- Reproduced published GAN models and trained them from scratch on the company's GPU server.

Technologies: Python, TensorFlow

PROJECTS

canon, Toolkit for AI Coding Agents
Jan 2026 – Present

Website · npm · GitHub

- Built a CLI and Claude Code plugin that sends each change through a planner, a worker and a reviewer agent.
- Runs all my repositories day to day, with every pull request merged by hand.

Technologies: TypeScript, Bun, Bash, Claude Code, Vitest, GitHub Actions

Frameboard, Design Board for Coding Agents
Oct 2026 – Present

Website · npm · GitHub

- Built a local design board where coding agents draw interfaces as HTML, steered by hand or with notes.
- Shipped it on npm with a Claude Code plugin that checks each frame an agent writes.

Technologies: TypeScript, React, Hono, Playwright, Vitest, GitHub Actions

EDUCATION

MSc in Engineering, Engineering Physics
2019–2024

Chalmers University of Technology, Gothenburg · BSc Engineering Physics, MSc Complex Adaptive Systems
